PROFESSIONAL SUMMARY

Experienced Software Engineer who has overseen large and successful projects throughout the area. Adopt at having technical discussions with client and all levels of company management, recommending project changes that make a project more efficient and working closely with project managers to get projects to finish on schedule and under budget. I have experience about service integrations, SAP integrations with our modules, and API documentations adapt to our software. Experienced on Document Management Systems(DMS),Enterprise Resource Planning(ERP),Customer Relationship Managment(CRM) software programming on C#.

EXPERIENCE

Project Manager

Mechsoft – İstanbul,Ataşehir
January 2022 - Now

In this process, I participated in technical interviews for new recruits and expressed their opinions. I had the chance to check the competencies of the people who will join the team. I carried out performance follow-ups in 360 evaluations with our colleagues working in the team. At the point where we have become a team of more than 10 people, everyone has multiple customers and projects that they serve. In some projects, we held meetings on issues that could not be resolved and sought solutions together. I worked with each person on a one-to-one project and examined their competence and project compatibility. I have made divisions according to the competencies of the people in a way that can accelerate the teamwork, and by working together, we have clarified the areas of responsibility according to the expertise of everyone.

Team-Leader

Mechsoft – İstanbul,Ataşehir
January 2020 - 2022

I gained experience in scope, project management and team management. I conveyed and followed up my expectations from the customer and the team in a timely and complete manner. During this period, I still continued to have my own projects. I continued to gain experience in client meetings and development processes. I gained experience in working and directing as a team leader with people of similar age.

Senior Software Consultant

Mechsoft – İstanbul,Ataşehir
January 2019 - 2020

Odoo is an open source crm and erp application used by many companies and individuals around the world. It is a modular web application open to development based on Linux. In this context, I provided software consultancy to many of our customers. We held on-site meetings with companies and analyzed factory needs in terms of ERP. We implemented it into the software solution we offer by dividing the big jobs into parts and improving the existing system. We implemented it into the software solution we offer by dividing the big jobs into parts and improving the existing system.

Software Consultant

Mechsoft – İstanbul,Ataşehir
February 2017 - 2019

Working on M-Files which is well-known DMS(Document Management Systems) in worldwide. In addition, M-Files offers a very extensive workflow management system. It has its own development api structure and admin panel. A lot of development and interface work can be done here. The application comes as an empty package and offers a structure that we can shape from scratch according to customer analysis. Since M-Files is a Tailor-made product, we have provided consultancy in many sectors (Energy, Automotive, Sports, Banking, Insurance).

I was a software consultant in these applications. We were handling a project end-to-end. Our processes were progressing with development and testing processes after business analysis. We were working on 4-5 projects at the same time. During this period, I had the opportunity to work on more than 20 large projects. I was able to observe the customer experience during the analyzes and trainings. I gained customer management skills.
